Summary

After 11 years of proven reliability in logistics and auto parts management, i'm a transitioning into a career as a Python/Django Developer.
A self-disciplined professional, who has independently built three full-stack applications to secure and scalable web developmentand , and two static webistes.
My extensive background in inventory systems and warehouse optimization has equipped me with a strong logical mindset and a focus on efficiency.
I am ready to apply my technical skills and work ethic within a professional IT team, while continuing to grow as a developer every day.

Projects

Fishing Atlas
Developed a tracking app with external integration and complex relational data. Implemented reusable comment logic and secured the app using python-dotenv.

Blog System
A functional personal blog platform with full CRUD operations for managing posts. Features dynamic support for categories, image uploads, and authorship tracking. Optimized for performance and security using WhiteNoise for fast static asset delivery.

Smart Notely App
Secure personal notes management application focused on user session integrity. Implements robust security by isolating system settings via environment variables. Features a streamlined interface for efficient CRUD operations and data organization.

Manchester United Fan Site
Responsive UI design with HTML,CSS and JavaScript.

Family Gallery
Media handling & database models.

Work Experience

Auto Hit EOOD — Pleven
Manager Warehouse — 20/08/2014 - 02/01/2026
I have held a key role in logistics and inventory management for 11 years, ensuring high reliability and professionalism in daily operations.
I am responsible for optimizing warehouse workflows and maintaining precise inventory records and reporting.
And also a coordinate client relations and technical sales, ensuring a seamless process from stock management to final delivery.

Education

SoftUni
Software Developer — 03/03/2023 - 10/04/2025

Udemy Academy
Full Stack Developer — 02/01/2026 - 03/02/2026

Inspirations

Hobbies And Interests
I am a passionate angler and nature enthusiast, which inspired the development of my Fishing Atlas project.
As a dedicated Manchester United fan, i combined my sports passion with web development, by creating a custom fan site.
Family is my core value, and my first GitHub project was a personal album dedicated to preserving our shared memories.
I believe in learning by doing, focusing my energy on building applications that reflect my personal interests and values.
